Description: The Splint Line of products are aluminum malleable splints built from a thin core of aluminum alloy sandwiched between two layers of foam. The splints are extremely pliable, and when bent into any of three simple curves become rigid to provide support for injured limbs.

Classification/Rule: Class I, by Annex IX, Rule 1

Conformity Assessment Route: Annex VII

The Seaberg Company, Inc. declares under its sole responsibility that the above products to which this declaration relates, and which bear the CE Marking, are in conformity with the applicable requirements of EC Directive 93/42/EEC of 14 June 1993, concerning medical devices.
